

80/90 PUSH Branding and Assets

For 80/90 PUSH, our team proposed a concept inspired by a modern, clean aesthetic not usually seen in the transportation engineering field. Along with the logo and brand development, we also designed business cards and letterhead, presentation templates, project fact sheets, promotional and informational signage, and a video for the project website. This is the type of value-added service that our in-house team of creatives provides our clients.
