

The BEACON® ProAct® 200 is the only sump pump alarm and monitoring system that tests the entire installation under actual use conditions by delivering fresh water into the sump pit.

**AUTOMATED WEEKLY TEST AND 24/7 SUMP PUMP MONITORING SYSTEM:**

- Tests the Primary Pump with Fresh Water
- Tests the Back-up Pump with Fresh Water
- Tests for Weak Backup Pump Battery
- Alerts for AC Power Failure
- Alerts for High Water Level in Sump Pit
- Alerts for Low Ambient Room Temperature
- Sends Notifications by Email, Text, and Mobile App (With Subscription)
- Installs In Existing Sump Pump Installations Without Changes to Pump Hardware (Fresh Water Supply Required, Professional Installation Recommended)
- The Only Sump Pump Monitoring System on the Market that Pro-actively Tests the Sump Pump Installation Under Actual Operating Conditions Every Seven Days

You'll know that your sump pump will work when you need it to.

## The Beacon® ProAct® 200

Protect Your Basement With Today's Most Advanced Sump Pump Protection System.

Add the system to your new or existing sump pump installation!

- Works with all major brands of sump pumps installed in conventional sump pit liners without modification to the pumps or their float switches.
- Use it for your primary sump pump(s) in a single or alternating sump pump installation or with a two-pump battery-powered backup system.
- Receive remote monitoring and real-time alerts with the BEACON web and mobile apps for iPhone/Android.
