The technology we had on display at [#HIMSS24](#) was wild. 🤖

Our exhibition floor had everything—including case studies, product demos, and lectures from our industry's leading vendors. (If you were there, that includes you!)

And even though the range of products we saw was massive, we loved seeing how everyone's solutions centre around our common goal: health equity.

Let's take a lil trip down memory lane, shall we? 😊

Okay, so this just happened. 🤖

Our CEO [Hal Wolf](#) just signed a Memorandum of Understanding with the Republic of Korea. Right now, Korea's leading a national push for digital maturity in healthcare, and we'll be helping their hospitals do everything from EMR modernization to workforce development.

This is a huge move. To all our friends in Korean healthcare: we can't wait to help you reach your digital health goals—and we're already excited to see you in Seoul for [#HIMSS24APAC](#). (It's this October, save the date!)

Original audio

himssglobal We found love on the conference floor—love for empanadas, that is. 😊

Our opening reception just wrapped a couple hours ago, and we were there bopping around the whole time. The energy was so warm, and we loved seeing everyone networking, connecting, and munching.

Come walk through a #HIMSS24 moment in @niko.fox's shoes. 🙌

A picture is worth a thousand words, so here's a whole dissertation on [#HIMSS24](#). 📸

Jokes aside: today was beyond perfect. Big things happened, naturally—we launched our new INFRAM model, signed a Memorandum of Understanding with the Republic of South Korea, and kicked things off a keynote attended by tens of thousands.

But all the little moments count just as much, too. That side convo that's already becoming a real connection, that networking event that puts you closer to your goals, and that session that opened your eyes—we saw all that. It matters, and it's why we do this. ❤️
