Improve your quality of light with Smart Street Lighting NY.

A bright campus means the learning never has to stop. Smart street lights save money, and help make your community greener, brighter, and safer. NYPA helps large and small municipalities convert to energy-efficient LED street lighting. We simplify the process — managing it from start to finish — resulting in immediate savings for you at no upfront cost. Communities that install street lighting can save up to 50% or more in energy usage and costs. **NYPA puts New York in the best light.**
